The following definitions will be helpful in interpreting the figures in this report:

DWELLING: A dwelling is defined as a structurally separate set of living premises with private entrance from outside the building, or from a common hall-way or stairway inside. The entrance must not be through anyone else's living quarters.

HOUSEHOLD: A person or a group of persons occupying one dwelling unit is defined as a "household". Every individual is a member of some household. The number of households will thus be equal to the number of occupied dwellings. However, as will be seen from the historical table, this was not the case in earlier censuses, owing to a different definition of "household" employed prior to 1951. In the 1941 and earlier censuses housekeeping units within dwellings were distinguished as separate households, thus permitting two or more households to exist within one dwelling.

H. P. Brownlee

H. P. Brownlee,
Provincial Statistician.
